## Hands-On Classes

### **“The Ellis Experience”**

10 Hours of real world scenarios involving a taste of everything you would respond too!

One 10 hour session per day will unfold at the Cranberry Public Safety Training Center.

(1000 Maintenance Building Drive. Cranberry Township, PA 16066)

The scenarios will involve engine, truck, and rescue, riding positions/responsibilities. All while responding to everything from live fire to extrication incidents. All of the Instructors are local to Butler City, Adams, Cranberry, Pittsburgh, and surrounding areas. Adamant proven professionals in their craft and great friends of Jim! This will be a 10 shift at the firehouse running nonstop! You want to be at a busy house? Here's a taste of what that entails!

### **“Rapid Intervention Skills”**

(4 Hour Sessions running along side the Firefighter Survival class)

**Instructor: Assistant Chief Jim Crawford / Midway Fire Rescue**

Jim is a retired Assistant Chief of Operations from the City of Pittsburgh. Chief Crawford spent 20+ years working in Pittsburgh prior to retiring. Jim's passion has always revolved around the fire service. However, his drive targeted Rapid Intervention Techniques after the challenges that unfolded at the Bricelyn Street Fire on February 14th 1995. Jim has taught at FDIC for 24 years, the Firehouse Expo, Worcester Safety & Survival, and several other shows across the country.

Chief Crawford knew Jimmy like a brother. Working along side each other on the fire ground, teaching on the circuit, but most importantly at the family level.

**This class will revolve around real world incidents and the Rapid Intervention skills needed to perform on today's fire ground.**

### **“Firefighter Survival”**

(4 Hour Sessions running along side the Rapid Intervention Class)

**Instructors: The Pittsburgh Crew**

The Instructors involved in the Firefighter Survival Class are all close friends of Ellis! Working and teaching next to Jim for years in the Pittsburgh Bureau of Fire, at FDIC, and many other shows and events, not to mention locally! However, like many of us in the Pittsburgh region, we all have been influenced by Jim's relentless positive leadership and passion for the profession.

This class will revolve around real fire ground situations. A series of skills, teaching not only how to get out of certain life threatening issues but discussing situational awareness so that we can lessen the chance of finding ourselves in a bad spot! Conversation and skills that we ALL need!

**Acquired Structure for Rapid Intervention & Survival Trailer**

**Location: 13 Ogleview Road Cranberry Township, PA 16001**
